### \*VDO

Electricity plans must be compared to the Victorian Default Offer (VDO), set each year by the Essential Services Commission to make it easier to compare energy plans across the market in each region. The VDO is calculated based on an average usage customer in this region and does not include conditional discounts, solar feed-in credits, concessions / rebates or other fees. Your actual energy bill may be significantly different and will depend on your actual electricity usage, when you use electricity and if you have solar.
